PROFILE

Software developer with around 3 years of professional experience building custom web applications and business management systems. Work spans backend development, user interfaces, databases, APIs and deployment, with experience in SaaS and multi-tenant applications.

TECHNICAL SKILLS

Backend & data: Laravel, PHP, MySQL, REST APIs, Redis and queues.

Frontend: Vue.js, JavaScript, jQuery, Livewire, Inertia.js, Tailwind CSS, Bootstrap and Vite.

Delivery & integrations: Git, Linux servers, server deployment, AWS S3, payment gateways and third-party API integrations.

SELECTED PROJECT EXPERIENCE

Bharat Medical Hall - Back Office Management

Order management, employee records, attendance and role-based administrative access for medical retail operations.

Treeva Healthcare Management System

A public-facing healthcare website and administration platform for enquiries, appointments, patient records, billing and staff.

Education Management SaaS

Institutional administration covering students, staff, attendance, fees and user roles, with a multi-tenant application architecture.

CRM & Business Management Platform

Lead and customer management, tasks, follow-ups, activity tracking and sales process functionality.

HRMS & Payroll System

Employee records, biometric attendance, shifts, leave, timesheets, salary templates and payslip generation.

Warehouse Management System

Inbound, putaway, storage, retrieval, inventory, cycle counting, barcode support and ERP/TMS integrations.

DRAFT NOTE

Temporary profile prepared from the supplied portfolio information. Employment history, exact dates and education will be added when the final resume is provided.
