PROFILE

Software developer with around 3 years of professional experience building custom web applications and business management systems. Work spans backend development, user interfaces, databases, APIs and deployment.

TECHNICAL SKILLS

Backend & data: Laravel, PHP, MySQL, REST APIs, Redis and queues.

Frontend: Vue.js, JavaScript, jQuery, Livewire, Inertia.js, Tailwind CSS, Bootstrap and Vite.

Delivery & integrations: Git, Linux servers, server deployment, AWS S3, payment gateways and third-party API integrations.

SELECTED PROJECT EXPERIENCE

Additional services available: custom CRM, inventory, warehouse and SaaS applications.

Bharat Medical Hall - Back Office & Business Management System

Baripada, Odisha | Full-Stack Laravel Developer. Independently developed the complete website and back-office platform: architecture, database design, backend, business logic and user interface.

Ten connected business modules

Orders, employee attendance, leave, payroll and salary, payslips, projects and tasks, challans, suppliers, customers and expenses. Centralizes daily operations to reduce manual work and improve administrative control.

KumbhSnaan - Digital Gateway to Nashik Simhastha Kumbh

Developed a spiritual booking platform for devotees worldwide. Features include Digital Snaan and Sankalp bookings, photo and prayer submission, preferred date and package selection, personalized ritual videos, digital certificates and sacred offerings.
